Projects

Professional Freelance Projects

Reops System (Ongoing)

Laravel-based system with multi-role management and dynamic modules.

- Course lifecycle with embedded videos
- Online payments via Mofatoorah API
- OTP system and integrated mail services
- Role-based dashboards and user control
- MVC pattern with clean, scalable structure

Shams Platform

A full Laravel MVC application for organization management.

- Auth system and user roles
- Admin dashboard
- Bootstrap-based responsive frontend
- Link: <https://shams.it>

Personal Projects (Practice & Learning)

Vanilla PHP E-Commerce

GitHub: [Project-E-commerce](#)

Developed from scratch using native PHP without frameworks.

- Product catalog, shopping cart, checkout
- Simple authentication system
- Built with procedural PHP then improved using OOP

University Management System (In Progress)

GitHub: [UNV](#)

Built using Laravel as part of personal training project.

- Students, courses, professors management
- Authentication, roles, dashboards
- Backend with Laravel + MySQL
- Still under development to apply learned concepts in real use cases.

Multi Vendor E-commerce

GitHub: [multi-vendor-ecommerce](#)

- Built with Laravel, MySQL, and Bootstrap
- Modular structure following MVC pattern
- Order management and user checkout process
- Vendor-specific dashboards and product CRUD
- Multi-auth system for vendors and admins

Education

Thebes Academy – Bachelor of Computer Science

Relevant Courses: Data Structures, Algorithms, Operating Systems, Software Engineering, AI

Certifications

PHP & Laravel Web Development Diploma – Eraasoft Academy (Dec 2024 – May 2025)

CS8: Introduction to Programming with C++ – Eraasoft Academy (July 2024 – Sep 2024)

University Projects

UML for E-Commerce

Designed full set of UML diagrams (Use Case, Class, Sequence, Activity, State).

Learning Management System (LMS)

Auth, course management, student enrollment, assignments, admin dashboard.

Collaborated with a client and built full MVC-based system.
